

## Fresh Perspective timeline

As a freelance content writer I created information-only sites — such as the online public involvement study below — and more image-heavy sites for art galleries, rental companies and pet rescue products. Along the way I learned the importance of researching and key word content in optimizing organic search.

survey charts

1. Louisiana to Iowa  
2. Haskell to Louisiana  
3. Harper to Haskell  
4. East Hills to Noria Road

Choose a shaded map section or button above for detailed maps and descriptions of existing corridor challenges.

#### Study Phase I

During this phase, the corridor study team is collecting data about existing corridor conditions. The elements being investigated include:

- Major Corridor — traffic volumes, signalized intersection capacity analysis, accident history
- Access Management — traffic signal spacing, signal cycle lengths, coordination or progression
- Enhancements — streetscape, pedestrian and bicycle mobility

#### Non-automobile Enhancements

Improving the corridor for automobile traffic is just one facet of the K10/23rd Street Corridor Study. Visual appearance, street lighting, green space, signing and community/neighborhood gateway will all be considered in relation to:
