

**Bee-Z Street companion brochure**

I created this mock-up to get my brainstormed idea out of my head and on paper. With something to visualize, I could then measure, figure out fold lines, paper size, think through assembly issues, etc.

### Folder cover

I designed this to fold bottom up for interior pocket.

### Folder insides

I printed on 11 x 17 size paper to have heavier weight that could be trimmed to accommodate standard resume. I created the pocket and cut the slits for a business card.
